

Medicines for Children provides practical and reliable information about more than 220 medicines for children and young people. The information addresses frequently asked questions, such as how and when to give the medicine, what to do if you forget to give the medicine, and any possible side-effects.

The website hosts many other useful resources for parents, such as general advice about medicines and how to give different types of medicines, and publishes regular news stories.

Medicines for  
Children  
home page

## A-Z of medicines

Medicines are listed in alphabetical order or can be identified from the search box using generic or brand name.

## How to give medicines

This section provides advice and videos on giving different medicine formulations.

## General information about medicines

This section provides general advice, such as giving antibiotics, travelling with medicines, side-effects, and the unlicensed use of medicines in children.

## QR code posters

We are developing a new series of posters displaying QR codes to give quick access to our medicines information. These posters are available to download and print out for use in clinics and hospital settings and to share with parents.

Please contact us if you would like a poster created for a particular therapy area or copies of existing posters with your organization's branding.

## How to use QR codes

- Scan the QR code using either your phone camera or a QR scanner app (which you can download from an app store).
- Click or tap on the icon or website banner that appears, which will take you to the right page on the website.
- You can read the information or download it onto your phone.
